PROFILE

Software Developer with strong proficiency in Java, MySQL, Data Structures & Algorithms, and Object-Oriented Programming. Skilled in analyzing requirements, designing scalable software solutions, and developing secure, reliable, and maintainable applications with a focus on performance and clean code.

EXPERIENCE

ENTUDIO PVT LTD

06/2024 – 07/2024 | Tirunelveli

Contributed to a Robotics Process Automation (RPA) project by developing software modules, implementing new features, supporting testing, debugging, and technical documentation while collaborating with a cross-functional team throughout robot development. Gained hands-on experience in PCB design using Fusion 360 (schematic design, routing, DRC, and Gerber generation), 3D modeling, and 3D printing for robotic prototype development.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

2022 – 2025 | Tirunelveli, Tamilnadu

Government College of Engineering CGPA-7.5

Diploma in Electrical and Electronics Engineering

2020 – 2022 | Madurai, Tamilnadu

K.L.N Memorial Polytechnic College 93.5%.

SKILLS

Technical Skills: Java, C, Spring Boot, HTML, CSS, JavaScript, MySQL, JDBC, Git, GitHub, Arduino, PCB Design.

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Digital Electronics, Problem Solving, Code Optimization.

Solved **250+** **LeetCode** problems and consistently practiced algorithmic problem-solving using Java.

PROJECTS

Banking Management System

Designed and developed a scalable full-stack Banking Management System using Java, MySQL, JDBC, HTML, CSS, and JavaScript with secure authentication, account management, and a user-friendly interface. Applied OOP principles and modular system design to build a secure, maintainable, and scalable application.

Student Management System

Implemented a scalable Student Management System using Java, MySQL, and JDBC with secure database connectivity, CRUD operations, role-based access control, and OOP principles to ensure efficient, reliable, and maintainable student record management.

Smart Induction-Based Rubber Pyrolysis System with IOT Monitoring

Built an IoT-enabled Smart Induction-Based Rubber Pyrolysis Monitoring System using Arduino, ESP32, and multiple sensors for real-time monitoring, automated control, and remote visualization. Improved operational safety, process efficiency, and reliability through embedded programming and IoT integration.

IoT-Based Smart Door Lock System using ESP8266

Engineered an IoT-based Smart Door Lock System using ESP8266, Wi-Fi, and a servo motor with password-based authentication and real-time device control. Integrated embedded systems and IoT technologies to deliver a secure, reliable, and automated smart home solution.

CERTIFICATES

Top 50 Winner – Niral Thiruvizha 2.0 Hackathon (2025)

Organized by Tamil Nadu Skill Development Corporation (TNSDC), Government of Tamil Nadu.
